

# Art Program

At Woodbridge Elementary we provide a strong art program aligned with the Maryland State Essential Curriculum goals. Each grade experiences sequential art lessons that build skills from grade to grade beginning in kindergarten and culminating in fifth grade as preparation for middle school.

Our students enjoy a variety of 2D and 3D art lessons, using many different materials. They work from imagination and direct observation to gain valuable fine motor skills. We also learn about art history and the work of famous artists.
