

Can You Measure Up?

On Thursday, October 1, students and families enjoyed a fun filled evening at Family Math Night. Families enjoyed *Interactive Measurement* through computer activities, were able to make a snack in *Trail Mix Measurement*, learner to tell time through stories like Me Counting Time and Tick Tock Jungle Clock, measured objects with paper clips, learned about angles and making predictions, and even measured their selves. A great time was had by all those that attended the evening. Check out some pictures of families having fun at Math Night.
