

OUTPATIENT MENTAL HEALTH PROGRAMS  
RESIDENTIAL CARE AND PSYCHIATRIC REHABILITATION

Dear Parents and Guardians,

Key Point Health Services has developed a school based program to provide family focused psychotherapy to children and their families in this school. Our clinical staff will work closely with your family to identify goals and develop a plan to meet your child's needs. If necessary, we also have two child psychiatrists available to work closely with your family by providing consultation and medications when indicated. All of our confidential services are provided by licensed mental health professionals.

**A child that might benefit from our services:**

- A child who is sad, irritable or depressed much of the time
- A child who has worries and anxieties
- A child who has isolated themselves or become withdrawn
- A child who has difficulty sitting still, concentrating, or completing class work or homework
- A child who is bullied, aggressive or violent towards themselves or others
- A child who cannot get along with family and/or peers or is rejected by them
- Family issues that are having a negative effect on the child such as parents who are separated, blended families, incarceration and financial problems
- A child who is dealing with grief and loss

**You can begin treatment by:**

Talking to your child's guidance counselor who in turn will refer your child to the Key Point Health Services school based therapist based in your child's school. Key Point's therapist will call you to obtain any additional information needed and schedule a time for a private and confidential admission interview.

**Who we accept:**

We only accept children who have Medical Assistance or children who are uninsured but who are eligible to receive Medical Assistance.

If you would prefer for your child to receive treatment at our clinic located in Catonsville, please call me to schedule an appointment for an admission interview. I can be reached at 410-788-0300.

Sincerely,

Sarah Reynolds, LCSW-C  
Coordinator of Children's Clinic and School Based Services
